SteriPEN

The SteriPEN Bottle Topper, made from 100 percent food-grade material, is designed to fit easily over the mouth of a SIGG bottle. This smooth, soft silicone bottle topper provides a comfortable cushion for your lips while at the same time protecting them from cold or hot temperatures. In addition to the enhanced comfort and customization opportunities, the SteriPEN

Bottle Topper for SIGG also acts as an adapter, creating a secure connection between a SIGG bottle and the SteriPEN Journey and Classic water purifiers. The

SteriPEN Bottle Topper for SIGG is available in lime green, royal blue, clear and black. SteriPEN uses ultraviolet (UV) light to destroy the DNA of disease-causing bacteria, viruses and parasitic protozoa. www.steripen.com
